

The Software

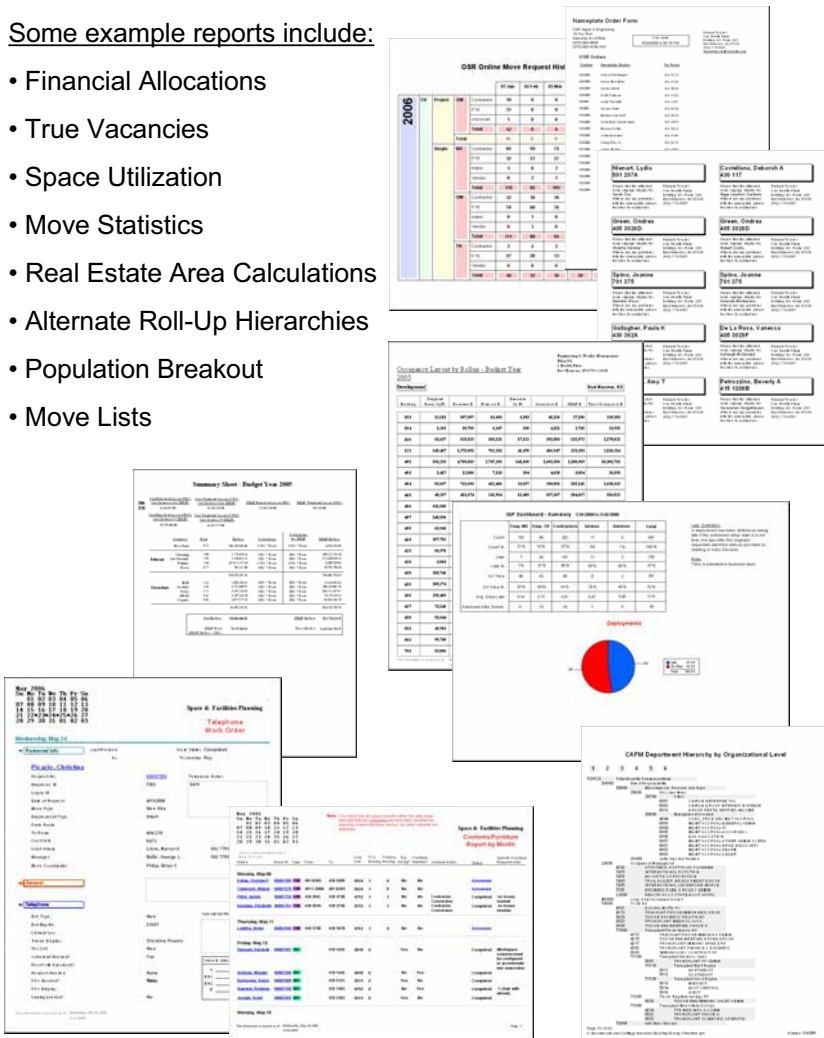

FM:Systems software is a powerful CAFM software suite used to manage facilities and share information throughout the organization. Crystal Reports is an advanced reporting application that allows you to query and display information to create eye-opening reports. Together, these applications work great together to collect, calculate, and display stunning dynamic reports about your CAFM data.

The Class

The class is designed to teach both basic as well as some advanced features of Crystal Reports while using typical FM:Systems CAFM data to generate reports for Facilities. It is tailored for the FM:Systems customers who want to take their reports to the next level.

Some example reports include:

- Financial Allocations
- True Vacancies
- Space Utilization
- Move Statistics
- Real Estate Area Calculations
- Alternate Roll-Up Hierarchies
- Population Breakout
- Move Lists

Crystal Reports for FMS

The Instructor

Dan Lorenz, AMS Technical Director, has years of experience working with Crystal Reports software creating reports for FM:Systems data at customers. He has extensive experience at gathering CAFM data and carving it out to create dynamic visual reports. As an implementation specialist for FM:Systems software, Mr. Lorenz has an exceptional knowledge of how the two software applications work together. His knowledge of the CAFM database allows him to better pick out the most meaningful data while his experience with Crystal Reports allows him to analyze, calculate, and group that data to display it on a visually impressive report.

The Details

What: Crystal Reports for FMS
When: Thursday Sep. 27th & Friday Sep. 28th
Where: AMS Training & Development Center
 Fairfield, New Jersey
Cost: \$995.00 per person
