

Autodesk Productstream Essentials

Courseware Description

This is a hands-on foundation course covering all features in Autodesk® Productstream® to enable you to implement automated release and change management processes with complete tracking of bills of materials (BOMs) and related design information. Students also learn how to integrate Autodesk Productstream with other business systems to improve information transfer and reduce errors associated with manual data entry. These integrations enable your extended team to use design information for purchasing, inventory management, and manufacturing.

Hands-on exercises representing real-world design scenarios are included.

Suggested Course Duration: 1 day
Pages: 254
Onscreen Exercises Included? Yes

Objectives

The primary objective of this course is to provide students with the knowledge and expertise to quickly and accurately share design data across a manufacturing team using Autodesk Productstream.

Who Should Attend

This course is designed for the new and novice user who requires comprehensive training in the use of Autodesk Productstream.

Prerequisites

It is recommended that the student have a basic working knowledge of Autodesk Vault, as well as Microsoft® Windows® XP or Microsoft® Windows® 2000.

Course Outline

Introduction to Autodesk Productstream

- Autodesk Productstream Overview
- User Interface

Using Autodesk Productstream

- Items
- Item Properties
- Revision Control
- Bills of Materials
- Change Orders
- Batch Plot

Using Autodesk Productstream With Other Applications

- Autoloader
- Integration with Other Applications

Autodesk Productstream Administration

- Managing Users and Access
- Configuring Items
- Setting Up Item Properties
- Setting Up Change Orders

Autodesk Productstream Explorer

- Using Autodesk Productstream Explorer

Note: The suggested course duration is a guideline. Course topics and duration may be modified by the instructor based upon the knowledge and skill level of the course participants.
